Subject Index to Volume 21

Abdominal muscles
  contraction in emphysema, in horses, 416
  pressure changes during phonation, 483
Acceleration stress: *see also* Gravity; Vibration, whole body
  bone, dynamic response characteristics, 1231
  carbon dioxide response, 404
  cardiorespiratory dynamics, 1725
  hyperventilation, 404
  lung volumes, regional, 778
  muscle contraction, skeletal, 1725
  muscle tissue, dynamic response characteristics, 1231
  pleural pressures, 1500
  respiration regulation, 404
  variable-radius centrifuge, instrumentation, 1938
  ventilation distribution, 778
Acetazolamide
  altitude protection, 1195
  respiratory alkalosis, 1195
Acetylcholine
  peripheral airway constriction, 217
Acclimatization to altitude: *see also* Altitude stress; Hypoxia
  acetazolamide, 1195
  acute altitude stress responses, 22, 73, 1168, 1589, 1732, 1741
  aging, 597, 609
  blood constituents, 73, 597, 994, 1177, 1181, 1185
  blood gases, 22, 609, 1589, 1595
  blood volume, 1168
  body composition, 1168, 1741
  bone composition, 1741
  cardiac output, CO_2 rebreathing method, 609
  cardiovascular dynamics, 22, 73, 609, 1589, 1595
  cardiorespiratory dynamics in exercise, 1168, 1191, 1589
  CO_2 response in whole-body vibration, 399
  corticosteroids, urinary, 73
  ECG, 73
  energy metabolism, 73, 597, 609, 1168, 1191, 1589, 1595, 1732
  erythropoietin, serum and urinary, 73
  hematopoiesis, 73
  hemoglobin synthesis, 73
  protein-bound iodine, 73, 1185
  pulmonary ventilation, 73, 399
  respiration regulation, 399
  serum protein synthesis, 1185
  thyroid gland function, 73, 1185
  work capacity, 609, 1168, 1191, 1589, 1595, 1732
Acid-base equilibria
  aging, 1040
  altitude, 1195, 1595
  apnea, posthyperventilation, 1363
  blood-brain electric potentials, 1309
  CO poisoning, 848
  CO_2 response in hypoxia, stimuli interaction, 393
  diet and arctic survival, 643
  exercise, 675, 1040, 1595
  heat stress, 1717
  hemorrhagic shock, 589
  hypoxia and anesthesia, 901
  microdetermination, microequilibration technique, 1103
  oxyhemoglobin dissociation curve, 195, 905, 1108, 1484
  peripheral blood flow regulation, 923
  Po_2-ventilation response in hypoxia and hyperoxia, 423
  potassium flux, red and skeletal muscle cell, 675, 679
  potassium, plasma, 675, 679
  pulmonary hypoxic pressor response, 358, 423
  red cell hydration, 675, 679
  respiration regulation, 358, 393, 423, 848, 1309
  slide rule calculator, 1108
  temperature and time effects, nomogram, 1484
Acclimatization to heat; *see also* Heat stress
  adrenocortical function, 99
  aging, 99, 597, 689
  Bantu, 978, 1586
  blood constituents, desert environments, 597
  cardiovascular dynamics, 631
  heat stress test, in gold mining, 1586
  histamine release in exercise, 631
  hot-humid environment, acclimatization time, 665
  individual variation, 978
  physical training effect, humid heat, 636
  sweat rate and chloride composition, 99
  sweat rate and rectal temperature, relationship, 107
  thyroid function, 689
  time requirement, humid heat, 665
  water metabolism in humid heat, 978
Active transport
  blood-brain barrier, brain hemiinfusion method, 1073
  blood brain barrier, hexoses, 1073
Adaptation to altitude
  carbohydrate metabolism, 1177, 1181
  comparative physiology, 375, 994, 1328, 1595
  lung morphology and diffusing capacity, 1328
  oxyhemoglobin dissociation curve, 375, 994
  polycythemia, 994
  red cell properties and volume, 994
Adaptation to cold: *see also* Cold stress
  noradrenaline hypersensitivity, 661
  reserpine effect, 661
  serum proteins in Eskimos and Caucasians, 685
Adenosine triphosphate
  platelet content, storage effect, 62
Adrenal gland, cortex
  acclimatization to heat, 99
  EEG alpha frequency, daily correlation, 549
  stress response and palmar anhidrosis, 88
  sweat rate and chloride content, relationship, 99
Adrenal gland, medulla
  stress response and palmar anhidrosis, 88
Adrenergic blocking agents
  convulsant drugs lung damage effects, 865
  epinephrine sensitivity in shock, 1261
Aging
  acclimatization to altitude, 597, 609
  acclimatization to heat, 99, 597, 689
  airway conductance, 469
  blood proteins, 583, 597
  blood volume, 583, 597
  body fat, potassium 40 and body density methods, 1251
  cardiovascular dynamics, 55, 1150
  connective tissue mechanical properties, 1602
  kidney function, response to tilting, 55
  lean body mass, 1251
  lung function, 233, 259, 469, 837
  lung volumes, specific-pathogen-free rats, 233
  metabolic acidosis of exercise, 1040
  N_2O solubility, blood, 1397
  orthostatic tolerance, 55
  red cell volume, 583
  respiratrory mechanics, specific-pathogen-free rats, 259
  sweat rate and chloride concentration, relationship, 99
  temperature regulation, 19, 99
  thyroid function, in heat stress, 689
  work capacity, 1040, 1150
Airflow rates
  accessory respiratory muscle function, 497
  brain cooling, 873
  breath-by-breath calculation, computer program, 1389
  decamethonium, 509
  emphysema, 416
  high atmospheric pressures, 1833
  horse, 416
  pressure, volume, flow relationships, maximal ventilation, 477, 1821, 1833
  singing kinetics, 483
Airway obstruction
  accessory respiratory muscle function, 497
  atelectasis, pathogenesis, 1315
  diaphragm electromyogram and tidal volume, 527
  hyaline membrane disease, 1315

Airway obstruction—*Continued*
phrenic nerve activity and tidal volume, 527
pressure-flow curve, isovolume, 1821
pulmonary artery ligation, 1315
respiratory center neural discharge, measurement, 527
respiration regulation, 527
volume-flow curve, maximal expiratory, 1821
Airway pressure
accessory respiratory muscles isometric force, 497
bronchial tree pressure-diameter relationships, 1448
bronchiolar collateral ventilation, 1443
dead space-tidal volume ratio, 1855
decamethonium, 509
lung shunts, sluice hypothesis, 347
lung surface properties, 1453
pharyngeal respiratory reflex, 454
pleural pressures, body position effect, 1500
pressure breathing, negative, 251
rib cage diameters, 1827
subglottic, in singing, 483
submersion, 251
Valsalva maneuver and thoracic aorta flow, 1553
Airway resistance
aging, 469, 837
atelectasis in spacecraft atmospheres, 828
compound 48/80 effect, 379
distribution, 469
emphysema, 416
height, 469
histamine release, lung, 379
horse, 416
lung compliance, and surface properties, 819
lung volumes, in singing, 483
measurement method, in anesthesia, 1913
pressure breathing, negative, 251
respiratory muscle mechanics, 477, 1827
respiratory muscle metabolism, anaerobic, 853
rib cage diameters, 1827
sex differences, 469
smoking habits, 469
specific-pathogen-free rats, 259
subglottic pressure, in singing, 483
submersion, 251
ventilation distribution, 794
Airways
acetylcholine and peripheral airway constriction, 217
bronchiolar collateral ventilation, 1443
bronchial dimensions, 1448
electrical stimulation and tidal respiration, 454
histamine effect, 185, 217, 379
main conducting volume from N_2 washout, digital computation, 202
respiratory reflexes, accessory, 454
serotonin and peripheral airway constriction, 217
Albumin I^{131}
lung blood flow distribution technique, gravity effects, 1381
lung scanning procedure, computer quantitation, 1381
Altitude stress: *see also* Acclimatization to altitude; Adaptation to altitude; Hypoxia
environmental chambers for small animals, 741, 1085
Alveoli, lung
blood flow distribution, regional, 760, 767
dimensions, in adaptation to altitude, 1328
duct constriction, 48/80 effect, 379
duct constriction, histamine effect, 217, 379
O_2 breathing and edema formation, 1477
pores of Kohn, collateral ventilation, 1443
surfactant material, alveolar metabolism, 1453
unit volume ventilation, 794
Anemias
blood flow regulation, local, 858
tissue gas tensions, 858
Anesthesia
airway resistance determination, 1913
atelectasis, 1471
blood gases, arterial, 1299, 1471
cardiorespiratory dynamics, 901
CO_2 tension, a-A gradient, 1299, 1471
dead space-tidal volume ratio, 1855
hypothermic, for germfree mouse thymectomy, 279
lung blood flow distribution, 901, 1299, 1351, 1471
lung surface properties and compliance, 819
O_2 tension, A-a gradient, 1471
pulmonary artery pressure, 1299
pulmonary hypoxic vasoconstrictor response, 901, 1351, 1439
vibration-induced hyperventilation, 404
Anesthetic agents
convulsant drugs lung damage effects, protection, 865
gas chromatography interference, elution method for, 745
histotoxic hypoxia, 1439
hyperbaric oxygenation and convulsions, 521, 865
hyperbaric oxygenation and lung damage, protection, 521, 865
pulmonary vasoconstrictor response and alveolar Po_2, 1439
Ankle jerk
fusimotor function, 1053
muscle action potentials, 1053
Anthropometry
body volume determination, 167
statistical evaluation, 167
Antihistamines
lung mechanics, 48/80 effect, 379
Apnea
esophageal and intrapleural pressures, relationship, 441
histamine, 185
intravenous hypertonic sodium chloride response, 383
pulmonary respiratory chemoreflex, 383
Apnea, posthyperventilation
CO poisoning, 848
CO_2 tension, alveolar, 411, 1363
CO_2 body stores, dynamics, 785
CO_2 tension, blood, 785, 848
metabolic acidosis, 1363
periodic breathing, 434, 1839, 1847
respiration regulation, 411, 785, 1363
wakefulness, 411, 1363
Apneusis
bilateral vagotomy and decerebration, in guinea pigs, 503
respiratory muscle electromyography, 503
Arctic climate
dietary supplements and survival, 643
fasting acidosis, 643
serum proteins, 685
Arterial occlusion
hydraulic occluder for electromagnetic flowmeter, 1400
site detection with Doppler flowmeter, 554
Astrand-Rhyming nomogram
maximum O_2 intake prediction, 513
validity coefficient derivation, 513
Atelectasis
airway obstruction, mechanical, 1315
anesthesia, 1471
arterial Pco_2 in anesthesia, 1471
hyaline membrane disease, 1315
lung lipid metabolism, 1292
lung mechanics, 1315
lung pressure volume curves, static, 1315
lung surface properties, 819, 1315
neonatal lamb, 819
N_2, as protection, 828
O_2 inhalation, 828
respiratory pattern; shallow ventilation, 819
spacecraft atmosphere, 828
transpulmonary pressures, end-expiratory, 819
Atropine
lung capillary flow pulse, 890
Autonomic nervous system
lung damage in oxygen convulsions, mechanism, 521, 865
pulmonary hypoxic vasopressor response, 1351
spleen weight in exercise, 1163

Baboon
blood coagulation mechanism, 1713
Bantu
acclimatization to humid heat, 978, 1586
standard heat stress test for gold miners, 1586
water metabolism, 978
Bed rest
calcium excretion, 1013
nitrogen excretion, 1013
Behavior
body temperature regulation, and aging, 19
cold stress, 655
diurnal temperature regulation, habit-linked, 623
habenular lesions, 655
Birds
estrogens and cardiac output, in leghorn cock, 1927

Blood-brain barrier
3-O-methylglucose transport, 1073
respiration regulation, 1309
Blood coagulation
heat stress, intense, 1218, 1717
Blood constituents
acclimatization to cold, Eskimos and Caucasians, 685
aging, 597
altitude, 73, 597, 994, 1177, 1181, 1185
desert environment, 597
epinephrine effects in chronic hypoxia, 1181
estrogen effect, 1927
exercise, aerobic and anaerobic, 597
insulin effect in chronic hypoxia, 1177
seasonal variation, 597
serum O_2 diffusion coefficient, 915
serum ultramicroanalysis, 1026
Blood flow, aorta
exercise, unsteady state, 953
thoracic aorta perfusion, method, 185
Valsalva maneuver, 1553
Blood flow, brain
electromagnetic flowmeter implantation and calibration, 1642
flow rate, impedance plethysmography, 329
hyperoxia, 567
periodic breathing, 1839, 1847
Blood flow, coronary
thermodilution method, catheter tip flowmeter instrumentation 1883
Blood flow distribution
aging, 55
rats, electromagnetic flowmeter method, 1273
tilting maneuver responses, 55
Blood flow, forearm
acute hypoxia, and hypocapnia, 22
breathing pattern, 33
capacity and resistance vessels, exercise reflexes, 123
face immersion, 33
leg exercise, 123
lower body negative pressure, 47, 1265
orthostasis, 47, 1265
pressure-volume relationships, venous, 573
venoconstriction, afferent mechanisms, 123
venous distensibility determination, 573
venous occlusion plethysmography, cuff inflator instrumentation, 700
Blood flow, kidney
aging and response to tilt, 55
hydrogen desaturation method, 1705
lower body negative pressure, 1699
Blood flow, liver
lactate clearance in exercise, 1773
portal vein sampling, instrumentation, 1649
pyruvate clearance in exercise, 1773
Blood flow, lung *see also* Ventilation-perfusion ratio, lung
airway obstruction, mechanical, 1315
alveolar gas composition, 1299, 1331, 1521
alveolar surface tension, 1545
anesthesia, 1471, 1855
atelectasis, 1315, 1471
blood gases, 1471
body position, 767
cardiopulmonary bypass, and postperfusion lung mechanics, 209
cardiorespiratory dynamics and venous circulation, 1276
CO_2 tension, a-A gradient in anesthesia, 1299
dead space-tidal volume ratio, in controlled ventilation, 1853
diffusible and non-diffusible indicators, methods, 1281
distribution, and regional lung volumes, 760, 767, 794
distribution, and ventilation distribution, 794
distribution, and volume history, 1545
emphysema and exercise, 1532
gravity, 760, 767, 1381
intrapleural pressures, 767, 794, 1545
lung lipid metabolism, 1292
lung shunts, sluice hypothesis, 347
lung surface properties, 1315
lung vascular pressures, 760, 767, 1299, 1306, 1545
lung vascular volume and resistance, 1306
mathematical model, 890, 1381
maturation, 1306
O_2 breathing, 1356
pulmonary to systemic artery transit times, 1281
red cell agglutinating substances, 928
respiratory mechanics, 760, 767, 794, 1276, 1315, 1381, 1545
scanning procedure, computer qunatitation, 1381
transfer function derivation, 1281
ventricular suction, 1276
vessel mechanics, 1276, 1306, 1545
Blood flow, lung capillary
analog computer model, 890
atropine, 890
body plethysmograph modification, method, 890
cardiac output, 890
exercise, isometric, 890
heat stress, 147
isoproterenol, 890
lung volume, 890
mitral valve disease, 890
nitrous oxide absorption method, 890
pulmonary vascular resistance, 890
pulse flow, factor analysis, 890
stroke volume, 890
Blood flow, peripheral
emotional stress response in rabbits, 1795
Franklin Doppler telemetry system, 705
iliac artery transducer implantation, in the horse, 705
lower body negative pressure, 1265
menstrual cycle, 1026, 1031
orthostasis, 47, 1265
O_2 saturation, blood, 923
pH, blood, 923
plethysmography, venous occlusion method, 334, 341, 573, 700, 701, 1403
pressure-volume relationships, forearm, 573
transcutaneous ultrasonic Doppler flowmeter, instrumentation, 554, 707
venous distensibility determination, forearm, 573
vasoactive metabolites, lung detoxification of, 923
venous blood vasodilator activity, 923
Blood flow, pulsaltile
electrical calipers for arterial dynamics, 1122
lung capillary, factor analysis, 890
pressure pulse derivative, quantitation, 326
pulmonary vein pattern and heart cycle, 1276
Blood flow, regional
arteriovenus O_2 difference, method, 567
O_2 carrying capacity, blood, 858
O_2 saturation, blood, 567
O_2 tension, tissue, 567
rat, electromagnetic method, 1273
transcutaneous ultrasonic Doppler flowmeter, instrumentation, 554, 707
Blood flow regulation
blood gases and autoregulation, 567, 923
methemoglobinemia, 858
O_2 carrying capacity, blood, 858
tissue gas tensions, 567, 858
venous blood vasodilator substance, 923
Blood gases
acceleration stress, 399, 1275
aging, 837, 1150
altitude stress, 609, 1589, 1595
anesthesia, 901, 1471
aortic chemoreceptor fibers conduction velocity, 543
apnea 411, 785, 1363
arterial desaturation in rats, 237
blood flow regulation, local, 858
body position, 959
burette-electrode microanalytic technique, 1391
capillary glass electrode, CO_2-sensitive, 1103
cardiac output, 567, 1345, 1471
cardiovascular dynamics, in hypocapnia, 22
CO determination, chromatographic method, 1368
CO poisoning, 848
CO_2 content, infrared analysis, 1377
dead space-tidal volume ratio, 1850
digital computer program, 1375
ear oximeter for O_2 saturation 1561
emphysema, 1532
endemic chronic bronchial disease, in rats, 237
exercise, 675, 959, 1143, 1150, 1345, 1595, 1807, 1815
heat stress, 1717
hemorrhagic shock, 589
hyperkalemia, 679
hyperventilation, 247, 411, 785, 1363
infants, 1371
interpolation technique, evaluation, 1103
liquid ventilation, hyperbarically oxygenated saline, 177
lung shunts, 1471
methemoglobinemia, 858
microcathode O_2 electrode, calibration and construction, 725, 729

Blood gases—*Continued*
microequilibration technique, 1103
N_2O solubility coefficients, 1398
nomogram for prediction, dog blood, 195
O_2 diffusion, serum, 915
O_2 inhalation, 463, 1356, 1477
O_2 ventilatory response curve, 423, 447
obesity and exercise, 1807, 1815
periodic breathing, 1839, 1847
peripheral blood flow, 923
peripheral chemoreceptor activity, 423
polarography, 725, 729
potassium flux in acidosis, 679
pulmonary-systemic artery circulatory transfer function, 1281
pulmonary vascular resistance, 358
regional blood flow, 567
single breath analysis, 1338
red cell age and O_2 kinetics, 173
resaturation curves and heart function, 1561
respiration regulation, 1281, 1309
respiratory muscles metabolism, 853
slide rule calculator, 1108
specific-pathogen-free rats, 237
spectrophotometry method, 737
tissue gas tensions in methemoglobinemia 858
vascular response, mechanism, 858, 923
work, maximal, 317
Blood metabolism
blood analyses, correction factor, 1484
Blood pooling
lower body negative pressure, 1265
shock, hemorrhagic, 589
Blood pressure, aorta
aortic chemoreceptor fiber conduction velocity, 543
arm and leg exercise, and body position, 37
auscultatory and intra-aortic; and work levels, 317
cardiac output determination, 1864
heart sound amplitude, II A, 938
Blood pressure, arterial
acceleration stress, 1725
altitude, 609, 1168
cardiac output determination, 1864
dietary constituents, 1157
direct and indirect; and work levels, 317
emphysema, in horses, 883
heat stress, intense transient, 1717
hemorrhagic shock, 589
histamine release, lung, 379
hypoxia, 22, 609, 901, 1168, 1589, 1595
leg exercise, 123
major vessel occlusion technique, modification, 1139
norepinephrine response in hypotensive shock, 1261
obesity and exercise, 1815
radiotelemetry system for free ranging animals, 1633
renin release in supine exercise, 1709
work capacity in aging athletes, 1150
Blood pressure, intracardiac
catheter tip transducer, instrumentation, 1412
heart sound amplitude, II A, 938
right heart failure, in swine, 1256
Blood pressure, pulmonary artery
anesthesia, 901, 1299, 1351, 1439
arm and leg exercise, 37
cardiopulmonary bypass, and postperfusion lung mechanics, 209
CO_2 tension, a-A difference, 1299
dead space-tidal volume ratio, 1855
emphysema, in horses, 883
exercise and body position, 37, 959
hemorrhagic shock, 589
histamine release, lung, 379
hypertonic sodium chloride response, 383
hypoxic vasoconstrictor response, 358, 901, 1351, 1439
lung blood flow distribution, 760, 1545
lung capillary blood volume in shock, 365
pulmonary ventilation, controlled, 1855
ventilation distribution, 794
Blood pressure, venous
acceleration stress, 1725
arm and leg exercise; and body position, 37
heat stress, intense transient, 1717
hemorrhagic shock, 589
lower body negative pressure, 47, 1265
orthostasis, 47, 1265
Blood vessels
electrical calipers for pulsatile dimensions, arteries, 1122
external iliac transducer implantation, in the horse, 705
instrumentation for measuring and recording, arterioles, 299
portal vein sampling procedure, instrumentation, 1649
pulmonary artery occlusion, 209, 1256, 1292, 1315
Blood vessels, dynamics: *see* Vascular dynamics
Blood volume
aging, 583
altitude, 597, 994, 1168, 1741
cardiac output and leg volume, 1750
estrogen effect, 1927
exercise, 516, 597
heat stress, 147, 597, 1717
hemorrhagic shock, 365, 589
lung capillary, 147, 365, 516, 803, 1477
lung diffusing capacity, 803, 1463
O_2 breathing, 1477
pulmonary emphysema, in horses, 883
seasonal variation, 597
Body composition
aging, 583, 1251
altitude stress, acute, 1168, 1741
determination of indices, 167, 583, 1251
growth and development, 167
water intake, 93
Body dimensions
lung diffusing capacity, 1463
sex differences, 167
Body fluid compartments
aging, 583
altitude stress, acute, 1741
extracellular fluid volume determination, 1573
humid heat, acclimatization, 978
magnesium exchange, 1688
sucrose C^{14} distribution, method, 1573
water intake, 93
Body weight
acclimatization, 151, 978
arctic survival, 643
cold, 151, 655
diurnal cycles in rats, 1935
exercise, 118, 1163
heat, 151, 987
hypothermia and tumor transplant growth, 1201
scale instrumentation, 1675, 1935
spleen-weight ratio in exercise, 1163
ventricular weight ratio in swine, 1256
Bone
altitude stress, acute, 1741
critical velocity, stress-strain relationship, 1231
mineral distribution, microradiography, 309
radioisotope distribution, autoradiography 309
Bone metabolism
calcium 47 kinetics, 67
bed-rest, prolonged, 1013
gravity and weight bearing effect, 1013
mathematical model, 67
strontium 85 kinetics, 67

skin temperature, 617
temperature regulation, 617
tympanic membrane temperature, 617
Valsalva maneuver, 1553
venomotor reflexes in exercise, afferent pathways, 123
venous blood vasoactive substance, 923
water immersion, warm and cold, 1577
Vascular dynamics, pulmonary
acid-base equilibria, 358
anesthesia, 901, 1299, 1351, 1439
blood gases, 358, 901, 1351, 1439
body position, 959
cardiorespiratory dynamics, 1276
emphysema, in horses, 883
exercise, 959
hemorrhagic shock, 589, 1261
hypothermia, 1351
lung capillary blood flow pulse, 890
lung surface properties, 1545
lung vascular volume, 1306
lung volume history, 1545
maturation, 1306
postperfusion cardiopulmonary bypass, 209
venous pulsatile flow pattern, 1276
Vasoactive metabolites
heat and work stress, and histamine release, 631
lung detoxification function, 923
venous blood vasodilator substance, 923
Venom toxicity
body temperature regulation, 1228
hypotension, and norepinephrine sensitivity, 1261
Ventilation-perfusion ratio, lung
alveolar gas composition, 1331, 1521
body position, 767
emphysema and exercise, 1532
gravity, 760, 767
lung shunts, sluice hypothesis, 347
O_2 inhalation, 1356
regional, 760, 767
respiratory frequency, in bronchitis and emphysema, 877
series distribution, 1521
Vibration, whole-body
cardiorespiratory dynamics, 1725
pulmonary ventilation, 399, 404
respiration regulation, 399, 404

Water metabolism
Bantu, 978
body composition; fluid volume and osmolarity 93
hot-humid environment, 93, 978
statistical analysis, 93
Women
cardiovascular dynamics, in stairclimbing, 1078
energy expenditure in sports, 133
exercise classification, 133
Work capacity
acid-base equilibria, blood, 1040
aging, in athletes, 1150
altitude, 1168, 1191, 1589, 1732
anaerobic muscle power determination, 1662
Astrand-Rhyming nomogram, validity coefficient, 513
blood lactate, 1040, 1767
body position, 1750
direct and indirect arterial pressures, 317
exercise training, 603, 636, 1150, 1168, 1191
exercise, unsteady state, 1345
heat stress test in gold mining, 1586
hot-humid environment, 665, 1586
hypoxia, 1143, 1589
leg volume, 1750
lung diffusing capacity, 1463
obesity, 1807, 1815
O_2 transport system components, 1463
swim-to-exhaustion time, reproducibility, 1431
treadmill and step-test procedures, comparison, 1387
walking in snow, 1747

Contents of Volume 21

No. 1. JANUARY 1966

Taste theories and the chemical stimulation of single papillae. *Von Békésy, G.* ... 1

Relation of odor flow rate and duration to stimulus intensity needed for perception. *Schneider, R. A., C. E. Schmidt, and J. P. Costiloe* ... 10

Exercise and the patellar reflex. *Tipton, C. M., and P. V. Karpovich* ... 15

Behavioral thermoregulation in young and old rats. *Jakubczak, L. F.* ... 19

Role of hypocapnia in the circulatory responses to acute hypoxia in man. *Richardson, D. W., H. A. Kontos, W. Shapiro, and J. L. Patterson, Jr.* ... 22

Blood flow in rigid tubes: thickness and slip velocity of plasma film at the wall. *Hershey, D., and S. J. Cho* ... 27

Circulatory responses to immersing the face in water. *Brick, I.* ... 33

Circulatory adaptation to arm and leg exercise in supine and sitting position. *Bevegård, S., U. Freyschuss, and T. Strandell* ... 37

Response of capacity vessels in human limbs to head-up tilt and suction on lower body. *Samueloff, S. L., N. L. Browse, and J. T. Shepherd* ... 47

Influence of age on the cardiovascular and renal responses to tilting. *Lee, T. D., Jr., R. D. Lindeman, M. J. Yiengst, and N. W. Shock* ... 55

Effect of thrombin on glycolysis of fresh and stored platelets. *Corn, M.* ... 62

Strontium and calcium skeletal discrimination determined by compartmental analysis. *Cohn, S. H., S. R. Bozzo, J. E. Jesseph, C. Constantinides, E. A. Gusmano, and J. S. Robertson* ... 67

Early erythropoietin, blood, and physiological responses to severe hypoxia in man. *Siri, W. E., D. C. Van Dyke, H. S. Winchell, M. Pollycove, H. G. Parker, and A. S. Cleveland* ... 73

Effects of hematocrit and plasma proteins on human blood rheology at low shear rates. *Chien, S., S. Usami, H. M. Taylor, J. L. Lundberg, and M. I. Gregersen* ... 81

Physiological role of the adrenal medulla in the palmar anhidrotic response to stress. *Harrison, J., and P. C. B. MacKinnon* ... 88

Water consumption by man in a warm environment: a statistical analysis. *Greenleaf, J. E., E. G. Averkin, and F. Sargent II* ... 93

Sweat chloride concentration: sweat rate, metabolic rate, skin temperature, and age. *Dill, D. B., F. G. Hall, and W. van Beaumont* ... 99

Fatigue of the sweat gland response. *Wyndham, C. H., N. B. Strydom, J. F. Morrison, C. G. Williams, G. A. G. Bredell, and J. Peter* ... 107

Use of sweating rate to predict other physiological responses to heat. *Kraning, K. K., II, H. S. Belding, and B. A. Hertig* ... 111

Bouts of exercise and food intake in the rat. *Stevenson, J. A. F., B. M. Box, V. Feleki, and J. R. Beaton* ... 118

Reaction in man of resistance and capacity vessels in forearm and hand to leg exercise. *Bevegård, B. S., and J. T. Shepherd* ... 123

Energy expenditure of women participants in selected individual sports. *Skubic, V., and J. Hodgkins* ... 133

Comparison of man's responses to pulsed and unpulsed environmental heat and exercise. *Belding, H. S., B. A. Hertig, and K. K. Kraning* ... 138

Influence of proprioceptor activity in the ventilatory response to exercise. *Sipple, J. H., and R. Gilbert* ... 143

Effect of increased environmental temperature on pulmonary diffusing capacity. *Frayser, R., J. C. Ross, H. S. Levin, J. V. Messer, and J. Pines* ... 147

Cellular physiology of cold- and heat-exposed squirrel monkeys (*Saimiri sciurea*). *Chaffee, R. R. J., J. R. Allen, M. Brewer, S. M. Horvath, C. Mason, and R. E. Smith* ... 151

Alveolar carbon dioxide tension at increased ambient pressures. *Jarrett, A. S.* ... 158

Effects of various gases on handgear insulation. *Hall, J. F., W. W. Strobl, and W. B. Buehring* ... 163

Determination of human body volume from height and weight. *Sendroy, J., Jr., and H. A. Collison* ... 167

Kinetics of O_2 uptake by erythrocytes as a function of cell age. *Edwards, M. J., and N. C. Staub* ... 173

Pulmonary gas exchange in dogs ventilated with hyperbarically oxygenated liquid. *Kylstra, J. A., C. V. Paganelli, and E. H. Lanphier* ... 177

New method for perfusing bronchial arteries: histamine bronchoconstriction and apnea. *DeKock, M. A., J. A. Nadel, S. Zwi, H. J. H. Colebatch, and C. R. Olsen* ... 185

A nomogram relating P_{O_2}, pH, temperature, and hemoglobin saturation in the dog. *Rossing, R. G., and S. M. Cain* ... 195

Theory and clinical application of a digital nitrogen washout computer. *Shinozaki, T., J. C. Abajian, Jr., B. S. Tabakin, and J. S. Hanson* ... 202

Effect of cardiopulmonary bypass on pulmonary volume-pressure relationships and vascular resistance. *Edmunds, L. H., Jr., and W. G. Austen* ... 209

Effect of histamine, serotonin, and acetylcholine on the peripheral airways. *Colebatch, H. J. H., C. R. Olsen, and J. A. Nadel* ... 217

Distribution function of the clearance time constant in lungs. *Nakamura, T., T. Takishima, T. Okubo, T. Sasaki, and H. Takahashi* ... 227

Measurement of functional residual capacity in the rat. *King, T. K. C.* ... 233

Arterial blood gases in specific-pathogen-free and bronchitic rats. *King, T. K. C., and D. Bell* ... 237

Effect of stimulation of muscle afferents on ventilation of dogs. *Senapati, J. M.* ... 242

Arterial CO_2 tension adjustment rates following hyperventilation. *Sullivan, S. F., R. W. Patterson, and E. M. Papper* ... 247

Respiratory mechanics during submersion and negative-pressure breathing. *Agostoni, E., G. Gurtner, G. Torri, and H. Rahn* ... 251

Mechanical properties of the lungs in the rat. *King, T. K. C.* ... 259

A new method of analyzing the distribution of mechanical time constants in the lungs. *Nakamura, T., T. Takishima, Y. Sagi, T. Sasaki, and T. Okubo* ... 265

Mechanics of walking. *Cavagna, G. A., and R. Margaria* ... 271

Solubility of nitrous oxide in human blood. *Ostiguy, G. L., and M. R. Becklake* 1397
Hydraulic occluder for chronic electromagnetic blood flow determinations. *Jacobson, E. D., and K. G. Swan* 1400
An electric volume transducer system for plethysmographic recording. *Hyman, C., and T. Winsor* 1403
Accuracy of measurements of aortic regurgitation using continuous dye infusions. *Frank, M. J., P. Casanegra, and G. E. Levinson* 1405
Comparison of footboard and saddle supports for orthostatic tests on a tilt table. *Murray, R. H., J. A. Bowers, and E. R. Goltra* 1409

Catheter-tip instrument for measuring left ventricular diameter in closed-chest dogs. *Pieper, H. P.* 1412
Dynamic calibration of lingual pressure transducers. *Proffit, W. R., J. L. Fogle, L. W. Heitlinger, R. L. Christiansen, and R. E. McGlone* 1417
A flexible lever system for quantitative measurements of mammalian muscle dynamics. *Bahler, A. S., and J. T. Fales* 1421
A precision constant work-rate ergometer. *Atkins, A. R., and A. Nünlist* 1427
Reliability of exhaustive swimming in the laboratory rat. *McArdle, W. D., and H. J. Montoye* 1431
Isotonic and isometric forces of forearm flexors and extensors. *Singh, M., and P. V. Karpovich* 1435
A simple and inexpensive gastrostomy tube. *Moss, G.* 1438

No. 5 SEPTEMBER 1966

Po_2-dependent pulmonary vasoconstriction caused by procaine. *Lloyd, T. C., Jr.* 1439
Respiratory bronchioles as the pathway for collateral ventilation. *Martin, H. B.* 1443
Influence of lung parenchyma on pressure-diameter behavior of dog bronchi. *Hyatt, R. E., and R. E. Flath* 1448
Effect of ventilation on surface forces in excised dogs' lungs. *Faridy, E. E., S. Permutt, and R. L. Riley* 1453
DL and the dimensions and functional capacities of the O_2 transport system in humans. *Holmgren, A., and P.-O. Åstrand* 1463
CO_2 levels and pulmonary shunting in anesthetized man. *Michenfelder, J. D., W. S. Fowler, and R. A. Theye* 1471
Changes in lung volume, diffusing capacity, and blood gases in men breathing oxygen. *Caldwell, P. R. B., W. L. Lee, Jr., H. S. Schildkraut, and E. R. Archibald* 1477
Nomograms for correction of blood Po_2, Pco_2 pH, and base excess for time and temperature. *Kelman, G. R., and J. F. Nunn* 1484
Physiological factors underlying transthoracic impedance variations in respiration. *Baker, L. E., L. A. Geddes, H. E. Hoff, and C. J. Chaput* 1491
Pleural pressures at dorsal and ventral sites in supine and prone body positions. *Rutishauser, W. J., N. Banchero, A. G. Tsakiris, A. C. Edmundowicz, and E. H. Wood* 1500
Alveolar populations contributing to expired gas tension plateaus. *Read, J.* 1511
Stratification of ventilation and blood flow in the normal lung. *Read, J.* 1521
Distribution of ventilation and blood flow during exercise in emphysema. *Emmanuel, G. E., and F. Moreno* 1532
Effect of the volume history of the isolated lung on distribution of blood flow. *Pain, M. C. F., and J. B. West* 1545
Correlation between cardiac rate and P axis in the normal electrocardiogram. *Gross, D.* 1551
Effects of the Valsalva maneuver on blood flow in the thoracic aorta in man. *Fox, I. J., W. P. Crowley, Jr. J. B. Grace, and E. H. Wood* 1553
Assessment of cardiac function using resaturation curves. *McIlroy, M. B., D. W. Crawford, D. B. Jennings, and A. Naimark* 1561
Potassium in proximal tubule fluid of rats and Necturus measured with glass electrodes. *Khuri, R. N., W. J. Flanigan, and D. E. Oken* 1568
Sucrose distribution volume after nephrectomy or ureteral ligation in the rat and dog. *Lang, S., and K. D. Serkes* 1573
Thermal regulation during water immersion. *Craig, A. B. Jr., and M. Dvorak* 1577
A test of the effectiveness of acclimatization procedures in the gold mining industry. *Wyndham, C. H., N. B. Strydom, J. F. Morrison, G. A. G. Bredell, C. H. Van Graan, L. Holdsworth, A. Van Rensburg, A. Munro, and A. Levin* 1586
Hemodynamic response to work at simulated altitude, 4,000 m. *Stenberg, J., B. Ekblom, and R. Messin* 1589
Cardiovascular and metabolic responses of dogs to exercise at high altitude. *Vogel, J. A., and J. P. Hannon* 1595
Mechanical properties of skin: a bioengineering study of skin structure. *Ridge, M. D., and V. Wright* 1602
Hypercalcemia and gastric secretion in man. *Murphy, D. L., H. Goldstein, J. D. Boyle, and S. Ward* 1607
Electromyography of static and dynamic postures of the body supported on the arms. *Kamon, E.* 1611
Stimulation of internal organs by means of externally applied electrodes. *Palti, Y.* 1619

SPECIAL COMMUNICATIONS

Measurements of variable ventricular output by thermodilution: model experiments. *Cropp, G. J. A.* 1624
Telemetry of blood pressure in free-ranging animals via an intravascular gauge. *Van Citters, R. L., and D. L. Franklin* 1633
Correction of catheter distortion effects on mean transit time—dye-dilution method. *Scheel, K. W., A. W. Langill, and H. T. Milhorn, Jr.* 1637
Performance of a cuff-type blood flowmeter in vivo. *Dobson, A., A. F. Sellers, and F. D. McLeod* 1642
A polyethylene needle guide for percutaneous access to the portal vein of the dog. *Hales, M. R., W. E. Bloomer, and W. D. Widmann* 1649
Measurement of blood flow by external monitoring of radioisotopes. *Worsham, J. E., Jr.* 1653
Validation and dynamic applications of an ellipsoid model of the left ventricle. *Koushanpour, E., and W. D. Collings* 1655
Measurement of muscular power (anaerobic) in man. *Margaria, R., P. Aghemo, and E. Rovelli* 1662
A calorimeter for simultaneous determination of heat production and heat loss in the rat. *Caldwell, F. T., H. T. Hammel, and F. Dolan* 1665
A modified oxygen gauge for the rapid measurement of Po_2 in respiratory gases. *Elliott, S. E., F. J. Segger, and J. J. Osborn* 1672
A self-balancing scale for weighing human subjects. *Custance, A. C.* 1675
A simple nomogram for calculation of alveolar gas tensions and the V_D/V_T ratio. *Rosenzweig, D. Y., and J. Immekus* 1677
Demonstration without instruments of "first gas into the lung is last gas out." *Glauser, S. C., and E. M. Glauser* 1679
A simple connector for fine-wire EMG electrodes. *Basmajian, J. V., W. J. Forrest, and G. Shine* 1680

No. 6. NOVEMBER 1966

Urea transfer across the sweat glands. *Komives, G. K., S. Robinson, and J. T. Roberts* 1681
Eccrine sweat gland activity during the menstrual cycle. *Sargent, F., II, and K. P. Weinman* 1685
Mg^{28} kinetics in man. *Avioli, L. V., and M. Berman* 1688
Electromyography of the genioglossus muscles in man. *Bole, C. T., II, and M. A. Lessler* 1695
Sodium and water excretion and renal hemodynamics during lower body negative pressure. *Gilbert, C. A., L. A. Bricker, W. T. Springfield, Jr., P. M. Stevens, and B. H. Warren* 1699
Tissue blood flow in rat kidneys by hydrogen desaturation. *Haining, J. L., and M. D. Turner* 1705
Renin activity during supine exercise in normotensives and hypertensives. *Fasola, A. F., B. L. Martz, and O. M. Helmer* 1709
Similarities between baboon and human blood clotting. *Hampton, J. W., and C. Matthews* 1713
Cardiopulmonary effects of brief, intense thermal exposures. *Murray, R. H.* 1717
Cardiopulmonary effects of whole-body vibration in man. *Hood, W. B., Jr., R. H. Murray, C. W. Urschel, J. A. Bowers, and J. G. Clark* 1725
Energy metabolism at high altitude (3,475 m). *Consolazio, C. F., R. A. Nelson, L. O. Matoush, and J. E. Hansen* 1732
Alterations in body composition in man after acute exposure to high altitude. *Surks, M. I., K. S. K. Chinn, and L. O. Matoush* 1741
Effect of looseness of snow on energy expenditure in marching on snow-covered ground. *Ramaswamy, S. S., G. L. Dua, V. K. Raizada, G. P. Dimri, K. R. Viswanathan, J. Madhaviah, and T. N. Srivastava* 1747
Repeated serial determination of cardiac output during 30 min exercise. *Grimby, G., N. J. Nilsson, and H. Sanne* 1750

Esophageal, rectal, and muscle temperature during exercise. *Saltin, B., and L. Hermansen* 1757
Energy cost of leg kick, arm stroke, and whole crawl stroke. *Adrian, M. J., M. Singh, and P. V. Karpovich* 1763
Effects of aerobic work performed during recovery from exhausting work. *Gisolfi, C., S. Robinson, and E. S. Turrell* 1767
Splanchnic removal of lactate and pyruvate during prolonged exercise in man. *Rowell, L. B., K. K. Kraning II, T. O. Evans, J. W. Kennedy, J. R. Blackmon, and F. Kusumi* 1773
Heat stress and spermatogenesis in *Bos indicus* and *Bos taurus* cattle. *Skinner, J. D., and G. N. Louw* 1784
Effect of central cooling in man on pituitary-thyroid function and growth hormone secretion. *Berg, G. R., R. D. Utiger, D. S. Schalch, and S. Reichlin* 1791
Effect of ambient temperature upon emotional hyperthermia and hypothermia in rabbits. *Yokoi, Y.* 1795
Partitional calorimetric studies of man during exposures to thermal transients. *Hardy, J. D., and J. A. J. Stolwijk* 1799
Alveolar-arterial gas exchange during muscular work in obesity. *Dempsey, J. A., W. Reddan, J. Rankin, and B. Balke* 1807
Work capacity determinants and physiologic cost of weight-supported work in obesity. *Dempsey, J. A., W. Reddan, B. Balke, and J. Rankin* 1815
Effect of gas compression on pulmonary pressure, flow, and volume relationship. *Ingram, R. H., Jr., and D. P. Schilder* 1821
Deformation of the chest wall during breathing efforts. *Agostoni, E., and P. Mognoni* 1827
Breathing under high ambient pressure. *Lord, G. P., G. F. Bond, and K. E. Schaefer* 1833
Cheyne-Stokes breathing produced by a model of the human respiratory system. *Longobardo, G. S., N. S. Cherniack, and A. P. Fishman* 1839
Periodic breathing in dogs. *Cherniack, N. S., G. S. Longobardo, O. R. Levine, R. Mellins, and A. P. Fishman* 1847
Circulation and physiologic dead space changes on controlling the ventilation of dogs. *Suwa, K., J. Hedley-Whyte, and H. H. Bendixen* 1855

SPECIAL COMMUNICIATIONS

A model for the study of hemorrhagic shock in the rat: development of the method. *Whigham, H., and M. H. Weil* 1860
Arterial pressure pulse contours during hemorrhage in anesthetized dogs. *Herd, J. A., N. R. Leclair, and W. Simon* 1864
Improved apparatus for temperature-controlled perfusion of isolated hearts. *Senturia, J. B., and M. Menaker* 1869
A technique for mixing the blood of unanesthetized rats. *Davis, J. D., and N. E. Miller* 1873
Thermal stress and the electrocardiogram: a technical study. *Rautaharju, P. M., H. Wolf, P. Piironen, E. Äikäs, and M. J. Karvonen* 1875
Indocyanine green clearance in the rhesus monkey (*Macaca mulatta*). *Vogin, E. E., O. M. Moreno, D. A. Brodie, and P. A. Mattis* 1880
A thermodilution flowmeter. *Afonso, S.* 1883
A new catheter system for cannulation of thoracic duct of the rat. *Lee, D. S., and S. A. Hashim* 1887
An inexpensive floating-mesh electrode for EKG recording during exercise. *Burns, D. C., and P. D. Gollnick* 1889
Static and dynamic performance of Walton strain-gauge arches. *Shimosato, S., G. E. Herpfer, and B. E. Etsten* 1892
Correlated input-output stimulator for experimental physiology. *McCrady, J. D., M. H. Hinds, L. A. Geddes, and C. Vallbona* 1897
Mixing technique for the oxygen-hemoglobin equilibrium and Bohr effect. *Edwards, M. J., and R. J. Martin* 1898
A mass spectrometer for continuous analysis of gaseous compounds excreted by human skin. *Adamczyk, B., A. J. H. Boerboom, and J. Kistemaker* 1903
Evaluation of a computer solution of exponential decay or washout curves. *Rossing, R. G.* 1907
Voluntary control of the diaphragm in one subject. *Stigol, L. C., and A. C. Cuello* 1911
Measurement of respiratory resistance in anesthetized subjects. *Bergman, N. A.* 1913
Comparisons between the physiological, shivering, and parkinsonian tremors. *Stuart, D. G., E. Eldred, and W. O. Wild* 1918
A method of making a flexible cast of the lung. *Frank, N. R., and R. E. Yoder* 1925
Effects of estrogen on cardiac output, blood volume, and plasma lipids of the cock. *Sturkie, P. D., and J. M. Eiel* 1927
Paper chromatographic identification of catecholamines. *Laasberg, L. H., and S. Shimosato* 1929
Automatic weighing machine for small animals. *Abrams, R., and J. A. J. Stolwijk* 1935
An inexpensive variable-radius centrifuge for physiological experiments. *Howland, H. C., B. Howland, R. Strobele, and J. Jähde* 1938

CORRIGENDA

Volume 21, January 1966

Page 167: Sendroy, J., Jr., and H. A. Collison, "Determination of human body volume from height and weight." In footnote 10 (p. 171), reference 7 should be reference 17.

Volume 21, May 1966

Page 915: Yoshida, F., and N. Ohshima, "Diffusivity of oxygen in blood serum." The sentence near the end of the first paragraph of the introduction (p. 915) should read; "The values of diffusivity of oxygen in serum at 25 C ranged from 1.63 to 2.21 $\times$ 10^{-5} cm^2/sec depending on the thickness of the layer."

Volume 21, July 1966

Page 1163: Tipton, C. M., G. D. Tharp, and R. J. Schild, "Exercise, hypophysectomy, and spleen weight." In Table 2 (p. 1165) under spleen weight for hypophysectomy, the values should read 284 ± 18 for nontrained and 226 ± 8 for trained.
